

**Committee on Development/Committee on Artificial
Intelligence in a Digital Age (DEVE/AIDA)
Preparation Module**

The question of AI's position in the EU:

With the emergence of Artificial Intelligence as a significant force, various concerns have been raised, including data privacy and security, ethical complexities, and workforce disruption. Meanwhile, AI has continuously been improving and evolving, rendering us unable to keep up with its rapid pace.

Considering the Artificial Intelligence Act of 2024, how should the EU move forward? How can the European Union invest into this cutting-edge development and ensure the accountable and responsible use of AI in supporting human activity?

Dear delegates,

We are delighted to welcome you to the Committee on Development/Artificial Intelligence in the Digital Age of this iMEP session in the vibrant city of Athens! As we gather in this iconic birthplace of democracy, we are reminded of our shared commitment to fostering development and cooperation across the EU and beyond!

Our committee has been assigned the important task of examining the various implications of AI's rapid evolution. Although AI presents incredible opportunities for innovation and growth, it also poses significant challenges, such as concerns regarding data privacy and security, ethical dilemmas, and potential disruptions to the workforce. As delegates of this committee, your task is to come up with efficient solutions that will ensure the responsible use of AI.

To enhance the efficiency and effectiveness of our upcoming committee sessions, we kindly request that you conduct thorough research on the topics to be discussed in advance. Your proactive preparation will greatly ease the committee's workload, allowing us to focus on

60th INTERNATIONAL MEP ATHENS 2024

in-depth discussions and informed decision-making. Since writing a good resolution is a lot of hard work, it is essential to be well-prepared, highly motivated and to be willing to work together as a team.

To achieve the above, we have provided you with certain links to help you with your preparation. We don't want to overwhelm you with preparation links, so please carefully review the ones we have provided. However, we also strongly encourage you to research the topic on your own and use other means of information, such as magazines, documentaries, articles, etc.

Lastly, along with preparing your research material, you are inclined to form a **position paper**, that would discuss:

- i. An overview of the issue
- ii. The EU's action on the matter so far
- iii. The actions of the country you are representing
- iv. Your personal opinion about what the committee should focus on during the meeting

It doesn't have to be too articulate, as long as it includes the aforementioned. As for the format, it must be **12 pt Times New Roman, 1.15 spacing, full justification**. Your position paper should be submitted by **September 30, 23.59 CET at the latest!**

We hope our links are useful for your preparation and we are looking forward to meeting you at Model European Parliament!

Your CPs,

Valia and Zsombor

Questions to guide your research:

- How should the EU ensure the safe integration of AI concerning its controversial ethical and safety complexities?
- Which suggestions of the 2023 AI ACT should be put up for legislative purposes?
- How can the EU ensure that the regulatory framework of the AI Act is flexible enough to adapt to rapidly evolving AI technologies?
- What strategies should the EU adopt to attract and support investment in AI research and development?
